

# Sign up for the Long COVID Study

## You may qualify if:

- You are 25 years or older.
- You had COVID-19 at least 3 months ago.
- Since having COVID-19, you continue to have problems with memory, attention, and concentration.

**Washington University School of Medicine is conducting a clinical trial to evaluate the medication fluvoxamine as a possible treatment for individuals with symptoms of Long COVID.**

- Your participation will last approximately 22 weeks.
- There are 2 in-person study visits, lasting up to 2 hours each.
- Individuals not in the St. Louis Metropolitan area may have study materials delivered and complete assessments remotely.
- We will ask you questions about your memory, mood, and concentration throughout the study.
- You will receive either fluvoxamine or a placebo (sugar pills).
- Up to \$100 is provided for your time.
